

Fulcrum IT on winning team for Global C4I Installation Services Contract with a ceiling of \$1.3 Billion

Manassas, VA, January 31, 2011 – Fulcrum IT announced today that it is a vital team member on a contract awarded to Northrop Grumman subsidiary AMSEC LLC to provide Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) Installation Services. As part of this team, Fulcrum can now compete for task orders up to \$794 Million for the successful installation and operational certification of C4ISR systems by the Space and Naval Warfare Systems Centers for PEO (C4I & Space), Space and Naval Warfare Systems Command (SPAWAR), and other prospective U.S. Government and Foreign Military Sales customers.

Work will be performed aboard U.S. Navy shipboard, submarine, and shore based platforms on both the East and West Coasts as well as locations worldwide, and is expected to be completed by January 2014. If all options are exercised, work could continue until January 2016. The C4ISR systems are produced under various production contracts (separate from this contract) and are delivered as Government Furnished Equipment to this contract for installation.

“Fulcrum IT is excited to join AMSEC to provide installation and certification support to SPAWAR and ensure C4ISR mission success,” said Robert Blankenship, Fulcrum IT Vice President, DoD and Intelligence. “This program provides for a continuation of our worldwide support to DoD and the U.S. Navy”.
