Fulcrum Completes Acquisition of The PTR Group Expanding Intelligence and Research and Development Business

CENTREVILLE, VA, February 5, 2018—Fulcrum IT Services, LLC today announced that it has acquired The PTR Group, a provider of innovative software engineering, cyber security, real-time and embedded systems, Internet of Things (IoT) engineering, Software Defined Networking (SDN) and Machine to Machine (M2) engineering solutions. The acquisition expands Fulcrum's growth in the Research and Development (R&D) and Intelligence markets to include Cyber Operations and Research, Satellite and Robotic Control Software Engineering and Embedded Development. The purchase reinforces Fulcrum's commitment to providing pivotal performance to its clients leveraging leading edge solutions.

The PTR Group strengthens Fulcrum's intelligence business and expands Fulcrum's client portfolio including direct support to the Defense Advanced Research Projects Agency (DARPA), National Geospatial-Intelligence Agency (NGA), the Naval Research Laboratory and NASA providing real-time and distributed system technologies and software for military and space applications.

The acquisition bolsters Fulcrum's innovative technology support to our clients on evolving platforms leveraging emerging technology. Fulcrum CEO Jeff Handy said, "This acquisition expands Fulcrum's Cyber capabilities and solidifies Fulcrum's entry into the R&D markets complementing a mindset of innovative concepts and solutions to support cutting edge mission requirements". As thought leaders both Fulcrum and PTR strive to stay on top of emerging technologies that can advance capabilities and change outcomes in support of our client's objectives.

The PTR Group CEO and co-Founder Dean Thompson added, "Fulcrum's success in deploying innovative solutions, support to the warfighter and rapidly expanding business provide PTR employees an environment to impact a wider set of clients and their requirements. Fulcrum provides access to clients like the U.S. Special Operations Command, Military Intelligence organizations and the Army's Night Vision Labs where PTR's capabilities are extremely relevant".
